OUR MISSION

The mission of Alpena Power Company is to provide, in a responsible and environmentally compatible manner:

- for our customers, high-quality, low-cost services;
- for our employees, continuing development in a productive workplace;
- and for our shareholders, a fair rate of return on their investments

EXPLANATION OF CHARGES ON MONTHLY STATEMENTS

Customer Charge – is a fixed monthly charge on your bill allowing for the utility to recover the costs of metering, meter readings, and other customer-related operations costs, exclusive of demand and energy consumption.

Distribution Energy Charge – is a charge based on the quantity of electric energy or kilowatt-hours (kWh) used by a customer. This charge recovers the costs for a utility to deliver electric energy from the transmission system to a customer's premises, through the distribution system. It includes expenses for operation and maintenance of the distribution facilities.

Power Supply Energy Charges – is a charge based on the quantity of electric energy or kilowatt-hours (kWh) used by a customer. This charge recovers the cost of power purchased by the company to serve its customers; there is no mark-up or profit on this charge.

Sales Tax – The Michigan Dept. of Treasury requires utility companies to collect 4% sales tax from residential customers and 6% sales tax from non-residential customers and security lights.

Low Income Energy Assistance Fund (LIEAF) – Michigan Public Act 95 of 2013 created the Low-Income Energy Assistance Fund (LIEAF). A monthly surcharge on each retail billing meter to assist low-income, at-risk residents with their utility bills. The intention is to provide funds to prevent disconnection of service and help people become more energy self-sufficient. The surcharge is set by the Michigan Public Service Commission (MPSC). Michigan Department of Health and Human Services (MDHHS), in consultation with the MPSC, ensures that all money collected from the fund for a geographic area is returned, to the extent possible, to low-income customers seeking energy assistance in that area.

Energy Waste Reduction Surcharge (EWR) – Michigan Public Act 342 of 2016 allows for a utility to recover approved costs for their Energy Waste Reduction Plans through monthly surcharges. The MPSC approved a per kWh surcharge for residential customers and monthly per meter surcharges for business customers. Energy waste reduction aims to use less energy through energy efficiency, load management that reduces utility provider costs, or energy conservation.

Power Supply Cost Recovery Factor (PSCR) - The price APC pays for electricity is directly passed through to customers with no markup or profit. The PSCR contains some of the more unpredictable and volatile costs that occur. The current factor can be found on our website at [Alpena Power](#) under the rates tab.

Voluntary Green Pricing Program (VGP) – Available to any residential, commercial or industrial customer that wants to participate in a program that incorporates energy produced from renewable energy sources into their monthly usage.

Customers who participate will pay a VGP surcharge of \$0.0078 per kWh for the amount of electric usage, the customer opts to purchase, on a monthly basis. That surcharge is added to normal monthly bills under the customer's current rate category.

Please call our office at (989) 358-4900 to discuss your options or visit our website [Alpena Power](#) and view the Residential tab > Rates & Tariffs > Voluntary Green Pricing Program.

SPECIAL CHARGES

NSF check handling charge	\$25.00	Meter test charge.....	\$34.00
Meter reading charge	\$17.00	On-site collector's fee (trip charge)	\$17.00

*** Reconnection of service following disconnection for non-payment will be completed within 24 hours of payment. This will include the total balance due, a reconnect fee and possibly a security deposit. Payments can be made by phone 24/7 or at our office during normal business hours. Crews do not carry cash, and NO payments will be accepted in the field.*

During regular working hours	\$40.00	Outside regular working hours	\$80.00
------------------------------------	---------	-------------------------------------	---------

RESIDENTIAL SERVICE**Distribution Charges:**

Customer charge	\$5.25 per customer
Energy charge:	\$0.07926 per kWh for all kWh plus current EWR surcharge

Power Supply Charges:

Energy charge:	\$0.08536 per kWh for all kWh, plus or minus the PSCR factor
----------------------	--

LIEAF surcharge: Low-income energy assistance fund state surcharge subject to change

*Income Assistance Service Provision: Residential customers where total household income does not exceed 150% of the Federal Poverty Level, contact the office for more information.

Minimum charge:.....\$5.25 plus LIEAF State surcharge

State sales tax will be added where applicable

RESIDENTIAL PLUG-IN ELECTRIC VEHICLE SERVICE (PEV)

Opens to any customer eligible for Residential Service who uses Plug-in Electric Vehicles (PEV). This is not available for commercial or industrial service, or for resale purposes. The customer can select from two billing options, both of which include metering that is capable of separately identifying PEV usage.

Separately metered – customer will be billed for two separate meters, one for the PEV time of use rate and the other for the non-PEV usage.

Please contact our office at (989) 358-4900 to discuss our option and associated rates.

GENERAL SERVICE**Distribution Charges:**

Customer charge	\$7.50 per customer per month plus current EWR surcharge
Energy charge:	\$0.07413 per kWh for all kWh

Power Supply Charges:

Energy charge:	\$0.08801 per kWh for all kWh, plus or minus the PSCR factor
----------------------	--

LIEAF surcharge: Low-income energy assistance fund state surcharge subject to change

Minimum charge:.....\$7.50 plus current EWR and LIEAF State surcharges

State sales tax will be added where applicable

GENERAL SERVICE PLUG-IN ELECTRIC VEHICLE SERVICE (PEV)

Open to any customer eligible for General Service who uses Plug-in Electric Vehicles. This is not available for commercial or industrial service, or for resale purposes. The customer can select from two billing options, both of which include metering that is capable of separately identifying PEV usage.

Please contact our office at (989) 358-4900 to discuss your options and associated rates.

EFFICIENT ELECTRIC HEAT SERVICE (EEHS)

Residential and General Service Rates Available. Open to any customer eligible for the Residential or General Service Rates who uses Geothermal or Heat Pump Systems. The customer can select from two billing options, both of which include metering that is capable of separately identifying EEHS usage.

Please contact our office at (989) 358-4900 to discuss your options and associated rates.

STANDARD POWER SERVICE

Distribution Charges:

Customer charge:\$35.00 per meter per month plus current EWR surcharge

Capacity charge:\$15.922 per kW of billing demand

Power Supply Charges:

Energy charge:\$0.09219 per kWh for the first 300 kWh per kW billing demand,

PLUS:

.....\$0.08297 per kWh for the excess kWh over 300 kWh per kW billing demand, plus or minus the current monthly PSCR Factor

LIEAF surcharge: Low-income energy assistance fund state surcharge subject to change

Minimum Charge: The sum of the customer charge, current EWR and LIEAF State surcharges and the Capacity Charge.

State sales tax will be added where applicable

LARGE POWER SERVICE

Available to customers whose capacity requirements are at least 250 kW, but less than 1,300 kW.

Please call our office at (989) 358-4900 to discuss your options

LARGE INDUSTRIAL SERVICE

Available to customers whose capacity requirements are at least 1,250 kW, but less than 2,000 kW.

Please call our office at (989) 358-4900 to discuss your options

DISTRIBUTED GENERATION

In order to be eligible to participate in the Distributed Generation Program, customers must generate a portion or all of their own retail electricity requirements with an Eligible Electric generator which utilizes a renewable energy resource, as defined in our tariff.

Customers are billed according to their rate schedule for all inflow of power and receive a credit in dollars, rather than kWh, based on the outflow credit provision.

Please contact our office at (989) 358-4900 for information on the requirements and application for service.

OUTDOOR PROTECTIVE LIGHTING (LED)

Monthly Charge: One year minimum

\$17.76 per light for a 100- watt light on existing pole and existing secondary facilities

\$20.51 per light for a 100-watt light on new pole and new secondary facilities

\$29.85 per light for a 250-watt light on existing pole and existing secondary facilities

\$32.77 per light for a 250-watt light on new pole and new secondary facilities

Energy Waste Reduction Surcharge: State surcharge; subject to change

LIEAF surcharge: State surcharge; subject to change, plus or minus the PSCR Factor

State sales tax will be added where applicable

Nature of service: The company installs, owns, operates and maintains all lights.

*****Customers MUST report all non-functioning lights by calling APC at (989) 358-4900*****
